1 Öğrenme çıktısı: E12.2.R2 — **25 puan**

Many young people worry about occasional disagreements with their friends. Yet conflict, when handled with mutual empathy and maturity, actually strengthens interpersonal bonds by clearing unvoiced assumptions. Without occasional honest disputes, relationships remain shallow. Hence, constructive disagreements are an essential and beneficial ingredient of enduring friendships.

Summarize the overarching conclusion reached by the author concerning conflict in friendship.

Cevap: The author concludes that resolving constructive disagreements maturely is vital for building deeper, more durable friendships. Disputes handled with empathy eliminate misunderstandings and prevent relationships from remaining superficial.

2 Öğrenme çıktısı: E12.3.W2 — **25 puan**

Propose two practical and systemic municipal solutions to integrate disadvantaged people and individuals with disabilities into active economic life.

Cevap: First, municipalities can offer financial tax incentives and wage subsidies to local enterprises that hire and train disabled workers. Second, public transit and digital employment portals must be made fully accessible, paired with subsidized assistive technology.

3 Öğrenme çıktısı: E12.4.R2 — **25 puan**

(A) Defeat the rogue artificial intelligence boss to restore virtual city grid. (B) Create your cyber avatar and customize digital defensive tools. (C) Complete encrypted security puzzles to unlock the mainframe server. (D) Enter the cyberspace portal to begin the simulation.

Reorder the scrambled steps above into a logical game sequence from start to finish.

Cevap: The correct logical sequence is: (B) -> (D) -> (C) -> (A).
The player first creates the avatar, enters the portal, solves encryption puzzles, and ultimately defeats the rogue AI.

4 Öğrenme çıktısı: E12.5.R2 — **25 puan**

Psychological research demonstrates that spending at least twenty minutes in nature significantly reduces cortisol, the primary stress hormone, thereby elevating general mood and mental clarity.

What physiological change occurs when people spend time in green natural spaces, and how does it influence mood?

Cevap: Spending time in nature significantly lowers salivary cortisol levels, which is the body's primary biological stress hormone. This hormonal reduction decreases anxiety, restores emotional equilibrium, and sharpens cognitive mental focus.
